

Joint appeal of the Presidents of the Visegrad Countries
regarding the COVID-19 situation

Our region is facing a dire pandemic situation; it might further worsen with new coronavirus mutations.

The science is clear: vaccines are our best and most efficient prevention and protection against Covid-19: they substantially reduce the risk of serious complications and death.

We, the presidents of the Visegrad Four countries therefore call on everyone to get vaccinated as soon as possible for the sake of their health and the health of their close ones.
